

Leo Group Ltd

Leo Group Energy Policy

Leo Group Ltd is the parent company of a number of subsidiaries that provide a diverse selection of environmental services within food-chain, agricultural and sustainable energy markets.

Leo Group Ltd has been at the forefront of supporting energy efficiency innovations; hence it remains committed to continual improvement of its own energy performance through implementation of industry best practices wherever practicable.

The Leo Group of companies shall strive to promote the importance of responsible energy management within its practices through;

- Complying with all recognised legal obligations and PPC Permit energy management stipulations.
- Planning of its operations to enable continual improvement of its energy performance.
- Providing necessary resource to meet energy performance objectives and targets which shall be reviewed and updated on a regular basis.
- Raising awareness of energy efficient practices throughout its workforce through effective communication and training programmes.
- Procurement of energy efficient products and services within the scope of the organisation's operations.
- Promoting renewable and carbon neutral methods of generating energy resource for our own purposes and that of the external community.
